Rapid 80 device installation trunking
Just right for you!

Wide range of variants and straightforward design, with the new Rapid 80, we turn individuality into a standard. Discover our varied device installation trunking system.

Classic.
Rapid 80 plastic

Always great to look at. Rapid 80 plastic device installation trunking is a classic item in the office. It stands out on account of its economy, functionality and clear design.
Robust.
Rapid 80 sheet steel

Strong in steel. Barely anything troubles OBO sheet steel device installation trunking. On any wall, it shows stability and gives rooms a straightforward, modern gloss.

Elegant.
Rapid 80 aluminium

Smart outfit, perfect processing. You just have to look twice. With its anodised or pure white surface, the aluminium Rapid can bring elegance to the workplace.
Three times Rapid 80. Three times one system.

Rapid 80 combines design and function into a single system in an unfussy and convincing manner. Thanks to the consistent standardisation of system components, the three types of trunking can either be used as individual variants or in combination.

Rapid 80 is thus the right choice in any location where there is a lot to install. Function and an attractive appearance simply go well together in this device installation trunking. The clear advantage is also its flexibility. The right system is available for every building.
Aluminium
Discover the variety of our Rapid 80 device installation trunking.
Classic. Rapid 80 plastic.

The practical and economic solution for offices. Give your design ideas free rein with our classic plastic variant.

Range of variants

Four colours, one trunking height and three trunking widths, this is just how varied the Rapid 80 plastic range (GK) is. The trunking has one compartment and is symmetrical. All the trunking has pre-mounted trunking couplings.

- RAL 9010 pure white
- RAL 9001 cream
- RAL 7035 light grey
- RAL 7030 stone grey

Available dimensions (trunking height x trunking width)
- 70 x 110 mm
- 70 x 130 mm
- 70 x 170 mm
Practical details

The plastic variant offers exclusive pre-mounted trunking couplings. The trunking clamps too are just one of the intelligent details allowing rapid mounting.

Fittings

Fixed fittings, such as external and internal corners, flat angles and T pieces, allow tidy mounting. As a special feature, the plastic variant of the Rapid 80 also offers variable internal and external corner hoods as well as flat angle hoods.

Optional: Halogen-free version

With low smoke gas production, no corrosion and safety: Halogen-free Rapid 80 device installation trunking fulfils high safety standards. Completely manufactured from halogen-free plastics, if there is a fire, it reduces the amount of toxic smoke gases and the formation of corrosive substances.
Robust. Rapid 80 sheet steel.

It can stand a lot. Rapid 80 steel device installation trunking can show strength and resilience in any application situation.

Range of variants

Sheet steel Rapid 80 device installation trunking (GS) shows its solid class in two trunking heights and four trunking widths. The trunking has one or two compartments and can be symmetrical or asymmetrical. On request, we can also provide powder coatings in customer-specific colours, as well as laminations.

Available dimensions (trunking height x trunking width)
- 70 x 110 mm
- 90 x 110 mm
- 70 x 130 mm symmetrical and asymmetrical
- 90 x 130 mm symmetrical and asymmetrical
- 70 x 170 mm symmetrical, asymmetrical and as double trunking
- 90 x 170 mm symmetrical, asymmetrical and as double trunking
- 70 x 210 mm asymmetrical and as double trunking
- 90 x 210 mm asymmetrical and as double desk trunking
Fittings

Various fittings, such as internal corners, external corners and flat angles, allow perfect, tidy mounting. The variable plastic fittings are compatible with the sheet steel product range.

Resilient surface

Sheet steel trunking is particularly resilient and long-lasting. The powder-coated surface can withstand even strong impacts.

Trunking covers

With smooth, fluted or transparent covers for the 80 mm track, the system can fit into any interior. Additional RAL colours are available on request.
Elegant. Rapid 80 aluminium.

At home in high-quality office environments: Rapid 80 in anodised aluminium is a real eye-catcher in any workplace.

Fittings

Different fittings offer a lot of flexibility during planning. Internal and external corners, T pieces and flat angles allow tidy mounting.

Range of variants

With its anodised or pure white powder-coated surface, aluminium Rapid 80 device installation trunking (GA) can bring elegance to the workplace.

- Anodised
- RAL 9010 pure white

Available dimensions (trunking height x trunking width)

- 70 x 110 mm
- 70 x 130 mm
- 90 x 130 mm
- 70 x 170 mm symmetrical
- 70 x 170 mm asymmetrical
- 90 x 170 mm asymmetrical
- 90 x 210 mm double trunking
Anodised surface

During anodisation, metal surfaces are electrically oxidised. This creates an extremely hard, scratch-resistant surface. Compared to other treatment methods, no outside material is used. The metallic character of the aluminium remains intact. In addition, the method offers reliable protection against corrosion.

Easy installation

In the standardised 80 mm system opening, it is possible to engage switches, sockets and data technology quickly and easily. Matching accessories offer perfectly easy installation, from the wall end piece, through fastening panels to end pieces.
Three materials. One system.

Rapid 80 combines straightforward design and the highest quality with perfect handling in termination and processing. The trunking covers are smooth, fluted or transparent. Accessory parts, such as end pieces or variable fittings, fit both the plastic and sheet steel trunking and the aluminium trunking.

1. Accessory mounting boxes
The accessory mounting boxes are simply engaged in the system opening. They match the OBO Modul 45 and Modul 45connect series, as well as the product ranges of all switch manufacturers.

2. Partition and trunking clamp
Partitions and trunking clamps allow the safe, standardised installation of different voltage levels.

3. Fastening panels and convection grid profiles
Fastening panels make mounting at a distance from the wall easy. Convection grid profiles allow horizontal and vertical covering of the system.
4. End pieces
Saving the best until last: The various end pieces offer an attractive end. With fitting adapters, they fit on symmetrical and asymmetrical device installation trunking.

5. Noise and fire protection
Plenty of space for protection: Noise limit barriers or fire protection systems can be mounted in the area of a wall penetration.

6. Wall end piece
Open and closed wall end pieces with various dimensions and colours provide a tidy finish to wall penetrations.
